CABA Impact of Smart Grid on Connected Homes

Landmark Research Study

CABA Impact of Smart Grid on Connected Homes Research Report

IEEE and CABA have partnered to offer the CABA Impact of Smart Grid on Connected Homes Research Study via the IEEE *Xplore*® digital library. This study provides full details on the development, deployment, competition, strategic decisions, and emerging landscape of the residential smart grid on the connected home.

Delivers key information on smart grid and the connected home:

- Identifies the current status of connected home solutions and technologies
- Determines the existing and emerging supplier landscape and ecosystem
- Classifies the status of current residential smart grid deployment
- Accelerates innovation and patent development with convenient access to proven research all in one place
- Recognizes potential business models for stakeholders and determines the emerging opportunities for various industry participants

Access research from leading experts

The CABA Impact of Smart Grid on Connected Homes Report details the smart grid development on connected homes and deployment by:

- Comparing competing product strategies and communication of competitors
- Defining critical success factors to expand product offerings to end-user markets
- Determining product preferences for end-users
- Developing messaging that resonates with the target audience
- Establishing a market approach and foundation for strategic decision-making efforts
- Identifying market demand and growth areas for new products

Who can benefit from CABA Impact of Smart Grid on Connected Homes?

Companies developing smart home and smart grid technologies around the world

Institutions researching smart home technologies

Utilities worldwide

Innovators with a vision to redefine the smart home industry

Small startups eager to capitalize on the market

CABA Impact of Smart Grid on Connected Homes

Delivered through the IEEE *Xplore*® Digital Library

Access respected technology research that generates results

IEEE *Xplore* includes **top-ranked journals and technology research that is cited in patents three times more often than any other publisher.** With more than four million full-text articles and papers, IEEE *Xplore* is your gateway to more than 30% of the world's current literature in electrical engineering, electronics, and computer science.

Find relevant research faster with powerful search tools

IEEE *Xplore* combines an easy-to-use interface with powerful search features that make finding relevant research faster and more efficient.

Search: Intelligent features such as convenient type-ahead, a functional search breadcrumb trail, and a "Refine/Expand Results" module let you modify and find results easier than ever before.

Personalize: You can also personalize IEEE *Xplore* to create targeted saved searches and table of contents alerts, and set personal preferences.

Collaborate: Now integrated with the new IEEE Collabratec™ online communities and private groups, it is easier than ever for users to collaborate and organize their project documents.

IEEE *Xplore* also provides:

- More than four million documents in full-text PDF format, with more than two million in a robust, dynamic HTML format
- Multiple authentication options for on-site, remote, and mobile users
- INSPEC® abstract and citation records
- New mobile-friendly design
- Daily content updates

Get the latest research in a wide range of technologies:

IEEE content is packed with timely knowledge that enables engineers and researchers to take advantage of the latest methodologies and applications shaping industry today, in topics such as:

- Aerospace and Defense
- Biometrics
- Computer Hardware and Software
- Electronics
- Medical Devices
- Nanotechnology
- Optics
- Power Engineering
- Robotics
- Semiconductors
- Smart Grid
- Telecommunications
- Wireless Technology
