

Advance Your Career with Trusted Education from IEEE and Rutgers Business School

IEEE | Rutgers Online Mini-MBA for Engineers was developed to help corporate employees bridge the gap between business and engineering as they prepare for growth into management roles. It is the only online Mini-MBA program specifically designed for engineers.

What are Engineers and Technical Professionals Saying about the IEEE | Rutgers Online Mini-MBA for Engineers?

“The reason I joined this course was to get a better understanding of ‘the other side’. Being an engineer, our world mostly revolves around technical elements and sometimes it is a bit hard to break the ceiling and move towards the management side without first understanding their concepts, jargon, and processes. This course was well-structured to give us a taste of the world outside of the engineering realm and has helped me get a better understanding of various other dimensions associated with our business and products.”

Sohaib Sheikh - Technology Associate at the Largest Commercial Property Development and Investment Company in the United Kingdom

“My overall program experience was excellent and I have learned a lot which I apply to my day to day work! Not only did this program teach me the proper techniques of the negotiation process, but it also taught me different ways of managing the development of a new product and the importance of understanding the reason people want something and not only knowing what they want. Perhaps, most significantly the program helped me understand how important it is to have a good strategy in advance by knowing where to play and how to win before proceeding to commit to any plan and take actions. Program materials were excellent, the videos are fabulous and just the right length for a mini-MBA program for engineers. This program enhanced my skills in the engineering and management field. It was really valuable as I learned many things which I apply in my daily routine.”

Maria Efthymiou - IT / Web Developer at a Public Utility Company

“The program was super interesting, covering different topics presented by experts as well as professors with deep knowledge and hands-on experience. Videos of lectures were of good quality. The overall program gives a perfect insight into what a full MBA program looks like, and this is a nice preparation on what knowledge, competences, and skills we as engineers will need to be successful as future managers and to develop our careers.”

Almedin Kavaz - Operations Manager at a Leading Regional Security Coordinators (RSCs) Company

“It was a great opportunity to be part of such an amazing program which helped me advance my career by learning about new areas in management and business-like financial management, intellectual property, and global economics. It’s a highly recommended program for mid-career professionals who are looking to reach the next level.”

Hossam Ali - Project Manager at a Cyber Security Company
