

# MIT Press eBooks Library

## Computing & Engineering Collection

### IEEE has partnered with the MIT Press to bring high-quality eBooks content in computer science and engineering to the IEEE Xplore® digital library

Approximately 900 titles in fields including computer science, artificial intelligence, information theory, computer programming, information technology, and electrical engineering broaden the research available to your organization in one platform.

### MIT Press eBooks Library content areas— computing & engineering:

The collection of titles includes practical handbooks, introductory and advanced texts, reference works, and professional books, with an emphasis on leading areas of applied research, such as:

- Bioengineering
- Communication, Networking, and Broadcasting
- Components, Circuits, Devices, and Systems
- Computing and Processing
- Engineered Materials, Dielectrics, and Plasmas
- Engineering Profession
- Fields, Waves, and Electromagnetics
- Geoscience
- Power, Energy, and Industry Applications
- Robotics and Control Systems
- Signal Processing
- Transportation

### A sampling of some recent and popular titles:

- *Coding Democracy: How Hackers are Disrupting Power, Surveillance, and Authoritarianism*
- *Critical Perspectives on Open Development: Empirical Interrogation of Theory Construction*
- *Embodied Computing: Wearables, Implantables, Embeddables, Ingestibles*
- *Find Your Path: Unconventional Lessons from 36 Leading Scientists and Engineers*
- *How to Grow a Robot: Developing Human-Friendly, Social AI*
- *Innovation + Equality: How to Create a Future that is More Star Trek than Terminator*

### Quick Facts

Access to a specially selected collection of approximately 900 titles, handpicked for their relevancy to IEEE Xplore users

70% of titles in computing-related fields

17,800+ individual chapters

Up to 40 new titles added each year, many of which are unavailable on other eBook aggregator platforms

Backlist to 1943

KBART/MARC records available via the OCLC website (OCLC.org)

### Available in two purchase options:

#### Annual Subscription Option

Provides leased access to current year eBook titles plus leased access to the backlist of more than 860 titles.

#### Purchase Option with Perpetual Access\*

Provides perpetual access to current year eBook titles plus perpetual access to the backlist of more than 860 titles, with an option to expand your collection by purchasing new frontlist titles each year.

\*Perpetual access is offered solely via IEEE Xplore

# MIT Press eBooks Library—Computing & Engineering Collection

Delivered through the IEEE *Xplore*® Digital Library

## Access respected technology research that generates results

IEEE *Xplore* includes top-ranked journals and technology research that is cited in patents nearly three times more often than any other publisher. With more than 5 million full-text documents, IEEE *Xplore* is your gateway to more than 30% of the world's current literature in electrical engineering, electronics, and computing.

## Find relevant research faster with powerful search tools

The MIT Press eBooks Library is searchable in IEEE *Xplore* by keyword or subject, which will return all titles and book chapters relevant to your query. Keyword or subject searching allows users to find the topic of interest easily. View an eBook home page with table of contents linking to full-text chapters.

## Also in IEEE *Xplore*:

## IEEE *Xplore* also provides:

- More than 5 million documents in full-text PDF format, with nearly four million in a robust, dynamic HTML format
- Multiple authentication options for on-site, remote, and mobile users
- Abstract/citation and bibliographic records for subscribed content
- Mobile-friendly design
- Daily content updates

## About the MIT Press

The MIT Press is a leading university press affiliated with the Massachusetts Institute of Technology (MIT) in Cambridge, Massachusetts, specializing in science and technology. They are a leading publisher in diverse fields, such as architecture, social theory, economics, cognitive science, and computational science. As the major American university press for science and technology books, the MIT Press has a long-term commitment to the efficient and creative use of new technologies.

## Award-Winning Titles

Winners of the American Publishers Award for Professional and Scholarly Excellence (PROSE Award)

- *Reality Mining: Using Big Data to Engineer a Better World* by N. Eagle and K. Greene
- *Disaster Robotics* by R. Murphy
- *The Globalization of Clean Energy Technology: Lessons from China* by K. Gallagher
- *The Innovator's Hypothesis: How Cheap Experiments Are Worth More Than Good Ideas* by M. Schrage
